

Enabling **Local Energy** Autonomy... Everywhere

Eavor's solution (Eavor-Loop™) is an industrial scale energy generation system that mitigates or eliminates many of the issues that hinder other renewable forms of energy production.

Eavor isn't burdened with exploratory risk, limited to niche geographies, process intermittencies, grid connectivity or locating concerns.

Much like a massive subsurface radiator an Eavor-Loop™ simply collects energy from the natural heat gradient of the Earth via a highly efficient conductive system.

Eavor is the **Solution** the **World** Has Been Waiting For

As a completely closed- loop system, we circulate a benign working fluid which is isolated from the environment and therefore is scalable globally without fracking, GHG emissions, earthquake risks, water use, produced brine or solids or aquifer contamination.

Eavor-Loop™ produces much-needed reliable baseload power.
